PROFESSIONAL SUMMARY

Entry-level Data Analyst with a B.Sc. in Artificial Intelligence and hands-on project experience in data cleaning, validation, exploratory data analysis, ETL workflows, and dashboard development. Skilled in Excel, SQL, Python (Pandas, NumPy), Power BI, and Tableau. Experienced in analyzing datasets with 64,000+ records, identifying trends, preparing KPI reports, and translating findings into actionable business insights.

TECHNICAL SKILLS

Data Analysis: Data cleaning, data validation, preprocessing, exploratory data analysis (EDA), trend analysis, basic statistics

SQL & Databases: MySQL, joins, aggregations, subqueries, CTEs, window functions

BI & Reporting: Microsoft Excel (PivotTables, VLOOKUP, formulas), Power BI (DAX, dashboards, slicers), Tableau, KPI/MIS reporting

Programming & ETL: Python, Pandas, NumPy, ETL concepts, data pipelines, automation, CSV processing

PROJECTS

Customer Churn Analysis | Python, MySQL, Power BI

- Prepared and validated 64,374 subscription-customer records using Python and Pandas; standardized fields and created age, tenure, and churn segments.
- Used MySQL to analyze churn by payment delays, support calls, usage, contracts, tenure, age, and spend; identified a 5,992-customer high-risk segment with a 90.82% churn rate.
- Built an interactive Power BI dashboard with DAX KPIs and slicers; developed recommendations for payment reminders, support escalation, and low-usage engagement.

E-commerce Data Cleaning and ETL Automation | Python, Pandas

- Built a modular Python ETL pipeline to extract raw CSV files, apply reusable cleaning and validation functions across related tables, and export cleaned datasets.
- Automated date and type conversions, missing-value checks, text standardization, derived fields, and data-quality validation to produce analysis-ready data.

Bank Loan Report Summary Dashboard | Microsoft Excel

- Created Overview and Summary dashboards with KPI cards for applications, funded amount, amount received, average interest rate, and average DTI.
- Used PivotTables and formulas to analyze loan status, monthly trends, state, loan term, and home ownership for management-style reporting.

EDUCATION

B.Sc. Artificial Intelligence | CGPA: 7.48 | 2022–2025
Periyar Maniammai Institute of Science and Technology (PMIST), Thanjavur
HSC: 67% | 2022 SSLC: 62% | 2020
Nav Bharat Matriculation Higher Secondary School

CERTIFICATIONS AND TRAINING

- Deloitte Data Analytics Job Simulation — Forage | Aug 2026
- Data Analytics Course — NoviTech | Nov 2025
- HackerRank SQL (Basic) | HackerRank Python (Basic)

LANGUAGES

Tamil (Native) | English (Professional Working Proficiency)
