PROFESSIONAL SUMMARY

Entry-level Data Analyst with a B.Sc. in Artificial Intelligence and hands-on experience in data cleaning, validation, ETL-style workflows, KPI/MIS reporting, dashboard development, and business-focused insight communication. Skilled in Excel, SQL, Power BI, Tableau, and Python (Pandas/NumPy). Built reusable Python data-cleaning workflows and analyzed datasets of 64,000+ records to translate trends into actionable recommendations.

TECHNICAL SKILLS

Reporting & BI	Microsoft Excel (PivotTables, VLOOKUP, formulas, KPI/MIS reporting), Power BI (DAX, dashboards), Tableau
Data & Coding	MySQL and SQL (joins, aggregations, subqueries, CTEs, window functions), Python (Pandas, NumPy), ETL concepts (Extract, Transform, Load)
Analytics & Automation	Data cleaning, validation, preprocessing, basic statistics (mean, median, percentages, correlation), trend analysis, Python automation/data pipelines, data visualization

PROJECTS

Customer Churn Analysis | *Python, MySQL & Power BI*

- Prepared and validated 64,374 subscription-customer records using Python/Pandas; standardized fields and created analysis-ready age, tenure, and churn segments.
- Used MySQL to analyze churn across payment delays, support calls, usage, contracts, tenure, age, and spend; identified a 5,992-customer high-risk segment with a 90.82% churn rate.
- Built an interactive Power BI dashboard with DAX KPIs and slicers; translated findings into payment-reminder, support-escalation, and low-usage engagement recommendations.

E-commerce Data Cleaning & ETL Automation | *Python & Pandas*

- Built a modular Python ETL/data-cleaning pipeline to extract raw CSV files, apply reusable cleaning and validation functions across orders, customers, order items, payments, products, and related tables, and load cleaned outputs.
- Automated date/type conversions, missing-value and data-quality checks, text standardization, derived fields, and CSV exports to produce consistent analysis-ready datasets.

Bank Loan Report Summary Dashboard | *Microsoft Excel*

- Developed Overview and Summary dashboards with KPI cards for applications, funded amount, amount received, average interest rate, and average DTI.
- Used PivotTables and formulas to analyze loan status, monthly trends, state, term, and home ownership, supporting management-style portfolio reporting.

EDUCATION

B.Sc. Artificial Intelligence — CGPA: 7.48 | 2022–2025

Periyar Maniammai Institute of Science and Technology (PMIST), Thanjavur

HSC — 67% | 2022 • SSLC — 62% | 2020 | Nav Bharat Matriculation Higher Secondary School

CERTIFICATIONS & TRAINING

Deloitte Data Analytics Job Simulation — Forage | Aug 2026

Completed practical tasks in data analysis and forensic technology.

Data Analytics Course — NoviTech (Nov 2025) | HackerRank SQL (Basic) | HackerRank Python (Basic)

LANGUAGES

Tamil (Native) | English (Professional Working Proficiency)
